PPO - OUT-OF-NETWORK INSURANCE

If you have a PPO Insurance, you are out-of-network with our office. We can still provide you a HCFA form (Health Insurance Claim Form), which you can submit to your insurance. *Please make sure to ask for this form.*

We cannot negotiate with a patient's carrier on their behalf. If you are unsure of your insurance benefits, or have questions regarding reimbursement, please contact your insurance company directly, as the information can often only be communicated to you, the patient.

Please note that your insurance policy is an agreement between you and your carrier.

We are not part of a contract with your insurance company and therefore cannot guarantee any level of insurance reimbursement.

If a patient's insurance carrier refuses payment, for any reason, the patient remains responsible for the charges. Dr. Rachel West Inc. withdraws itself from involvement in out-of-network insurance disputes, but will provide the patient, or their insurance company, with any information that we are capable and able to release.

LABS/ SPECIALTY LABS

Dr. West's office works with various labs (e.g., Great Plains, Quest Diagnostics, Lab Corp, Pacific Medical Laboratory, Health Diagnostics, Doctors Data, Genova,...). This list is not exhaustive and evolves over time. The majority of the aforementioned labs can submit to the patient's insurance for any blood work/tests done through our office. **However, patients can often benefit from our office's special cash price, which might end up costing you less than the price you would pay if using your insurance.**

Additionally, when the patient's insurance does not cover the full amount billed, the patient is responsible for any unpaid amounts to the labs (i.e., co-payments, co-insurance and/or deductibles). These matters need to be taken up directly with the specific lab used for the patient's testing. Dr. West cannot be held responsible for any open balances related to payments that the patient's insurance refused to make for these labs.

PHYSICIAN CONTACT PROTOCOL

If a patient has a reaction to a medication, the best course of action is to stop taking the medication and schedule a follow-up visit.

In most cases, Dr. West is not able to communicate with patients outside of scheduled office visits, as she needs to be able to focus on her patients of the day.

Patients are welcome to send a message to Dr. West's team via email (assistant@longevity.la and assistant@dr Rachel West.com) or text messages: (310) 560-8982 or (310) 913-9961.

Questions that require a medical decision cannot be answered via e-mail; they require an office visit or phone consultation. Consultations may take place over the phone – especially follow-ups, but generally not initial consultations. Phone consultations are billed like regular office visits.

PHYSICIAN-PATIENT ARBITRATION AGREEMENT

Article 1: Agreement to Arbitrate: It is understood that any dispute as to medical malpractice, that is as to whether any medical services rendered under this contract were unnecessary or unauthorized or were improperly, negligently or incompetently rendered, will be determined by submission to arbitration as provided by California law, and not by a lawsuit or resort to court process except as California law provides for judicial review of arbitration proceedings. Both parties to this contract, by entering into it, are giving up their constitutional right to have any such dispute decided in a court of law before a jury, and instead are accepting the use of arbitration.

Article 2: All Claims Must Be Arbitrated: It is the intention of the parties that this agreement shall cover all claims or controversies whether in tort, contract or otherwise, and shall bind all parties whose claims may arise out of or in any way relate to treatment or services provided or not provided by the below identified physician, medical group or association, their partners, associates, associations, corporations, partnerships, employees, agents, clinics, and/or providers (hereinafter collectively referred to as "Physician") to a patient, including any spouse or heirs of the patient and any children, whether born or unborn, at the time of the occurrence giving rise to any claim. In the case of any pregnant mother, the term "patient" herein shall mean both the mother and the mother's expected child or children.

Filing by Physician of any action in any court by the physician to collect any fee from the patient shall not waive the right to compel arbitration of any malpractice claim. However, following the assertion of any claim against Physician, any fee dispute, whether or not the subject of any existing court action, shall also be resolved by arbitration.

Article 3: Procedures and Applicable Law: A demand for arbitration must be communicated in writing by U.S. mail, postage prepaid, to all parties, describing the claim against Physician, the amount of damages sought, and the names, addresses and telephone numbers of the patient, and (if applicable) his/her attorney. The parties shall thereafter select a neutral arbitrator who was previously a California superior court judge, to preside over the matter. Both parties shall have the absolute right to arbitrate separately the issues of liability and damages upon written request to the arbitrator. Patient shall pursue his/her claims with reasonable diligence, and the arbitration shall be governed pursuant to Code of Civil Procedure §§ 1280-1295 and the Federal Arbitration Act (9 U.S.C. §§ 1-4). The parties shall bear their own costs, fees and expenses, along with a pro rata share of the neutral arbitrator's fees and expenses.

Article 4: Retroactive Effect: The patient intends this agreement to cover all services rendered by Physician not only after the date it is signed (including, but not limited to, emergency treatment), but also before it was signed as well.

Article 5: Revocation: This agreement may be revoked by written notice delivered to Physician within 30 days of signature and if not revoked will govern all medical services received by the patient.

Article 6: Severability Provision: In the event any provision(s) of this Agreement is declared void and/or unenforceable, such provision(s) shall be deemed severed therefrom and the remainder of the Agreement enforced in accordance with California law.

I understand that I have the right to receive a copy of this agreement. By my signature below, I acknowledge that I have received a copy.

NOTICE: BY SIGNING THIS CONTRACT YOU ARE AGREEING TO HAVE ANY ISSUE OF MEDICAL MALPRACTICE DECIDED BY NEUTRAL ARBITRATION AND YOU ARE GIVING UP YOUR RIGHT TO A JURY OR COURT TRIAL. SEE ARTICLE 1 OF THIS CONTRACT.

Informed Consent

for Intravenous and Intramuscular Nutritional Therapies

I give Dr. Rachel West, Inc. as well as the Staff at her Office, Longevity Medical Center, permission to perform single or recurring intravenous and intramuscular Nutritional Therapy ("NT"). I am executing this consent to confirm my understanding of the risks, benefits, and alternatives to treatment with NT.

1. Benefits of intravenous and intramuscular Nutritional Therapy

Intravenous and intramuscular Nutritional Therapy (IINT) is used for a variety of conditions which include but are not limited to dehydration, vitamin, mineral and amino acid deficiencies, malabsorption, acute or chronic viral conditions, immune deficiencies, persistent fatigue, brain fog and exposure to chemicals and heavy metals. The various IINT protocols are provided to me according to the guidelines established by the American College of Advancement in Medicine (ACAM), the American Academy of Environmental Medicine (AAEM), and other professional organizations. IINT consists of the application of vitamins (e.g. B1, B2, B5, B6, B12, B complex, C, D), minerals (e.g. magnesium, calcium, sodium, zinc, selenium, trace minerals), amino acids (e.g. taurine, glutathione), anti-oxidants (e.g. Alpha Lipoic Acid) and nutrients (e.g. phosphatidylcholine).

IV Therapy should typically not be done on an empty stomach.

I understand that Dr. West makes no representations, claims or guarantees that my medical problems or conditions will be helped by IV Therapy treatments.

2. Risks of intravenous therapy include, but are not limited to:

Discomfort, bruising or pain at the injection site; skin rash; nausea; dizziness; fatigue; feeling lightheaded, flushing; headache; infection; lowering of blood sugar levels (hypoglycemia); lowering of blood pressure; inflammation of the veins (thrombophlebitis); inflammation of the vein used for injection and/or phlebitis allergies including life threatening anaphylactic reactions, severe allergic reaction, anaphylaxis, cardiac arrest and/or death.

A common objection against IV nutritional therapy is that a patient might delay or forego undergoing a generally accepted medical treatment. In case of cancer and other life-threatening disease, I understand that IV nutritional therapy is best used as an adjunct to the therapy recommended by my oncologist or specialist.
